screen, screen HD, dreamlike appearance,

CMIIT ID:

streamline shape, taste different.

Thank you for choosing

HV7-CV718 intelligent tablet computer.

The HV7-CV718 is designed for WCDMA/GSM

network dual-network dual

HV7-CV718 is based on

standby intelligent tablet computer, using

a fashion intelligent tablet

the latest Android TM 4.4.2 system, with

computer Android TM operating

strong quad-core processor, the

system, equipped with 7

industry high-end

inch high-definition

performance guarantee perfect experience

.7 inch screen, reducing the

nature pure bright colors;

HV7-CV718 new design more

concise interface, desktop exquisite

small parts, perfect to decorate

your personalized desktop; HV7-CV718

exclusive special software, call

management, books will be an easy job

to. Shine HV7-CV718 worth you savor!

Do not use any root tool of

the tablet computer, otherwise there may

be failure can not be restored, the root

tablet computer did not enjoy the warranty!

Please read the manual carefully before

use.

FCC caution:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and

(2) This device must accept any interference received, including interference that may cause undesired

operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to

provide reasonable protection against

harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in

a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

—Reorient or relocate the receiving

antenna.

—Increase the separation between the equipment and receiver.

—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

—Consult the dealer or an experienced radio/TV technician for help.

Specific Absorption Rate (SAR) information:

SAR tests are conducted using standard operating positions accepted by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands, although the SAR is determined at the highest certified power level, the actual SAR level

of the phone while operating can be well

below the maximum value, in general, the closer you are to a wireless base station antenna, the lower the power output.

Before a new model phone is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the exposure limit established by the FCC, Tests for each phone are performed in

positions and locations (e.g. at the ear and worn on the body) as required by the FCC.

handset a minimum of 1.0 cm from the body.

For body worn operation, this model phone has been tested and meets the FCC RF exposure guidelines when used with an accessory designated for this product or when used with an accessory that

Contains no metal and that positions the
